

Merbau Pergola

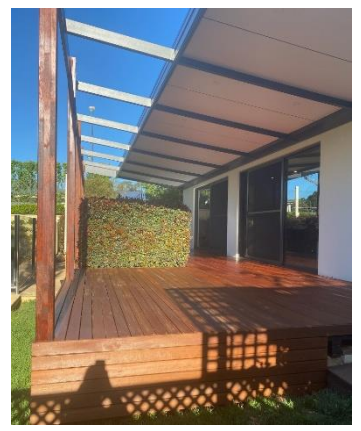

Location: Rosslyn Park, SA
Supplier: Freeman Wauchope Pty Ltd
Builder: Adam Richardson Builders
Engineer: Peter Graham (Conceptio Pty Ltd)
Products: Magna Merbau Glulam posts, beams and rafters
Other: Product and logistics support from Meyer Timber VIC

Posts and Beams erected

Rafters installed

Completed Pergola

Even the dogs are happy

Not only did the project require an attractive timber product that provided dimensional stability and durability, it was its strength that was particularly helpful in this instance.

The pergola had dimensional constraints where it was connected to the rear wall of the dwelling. The only timber that fulfilled the rafter span and spacing requirements, the depth restrictions and durability criteria was a 140x65 **Magna Glulam** rafter. This was used along with 115x115 posts, 290x42 pitching beams and 290x42 fascia beams along with the rafters, all Magna Glulam.

“The finished pergola is outstanding and the client is extremely pleased.”
