

SDWC Truss Screws – the Builder’s choice

Supplier: Meyer Timber
 Product: SDWC Truss Screws
 Manufacturer: Simpson Strong-Tie

“We now use SDWC as our standard truss fixing for all clients and none have complained or had any issues.”

“They are simple and easy to use, and the fact that working from heights can be eliminated makes SDWC screws all the more appealing.”

An *Installation Guide* is included in every box to help ensure proper installation angle is maintained.

“The boys on-site were stoked to use SDWC screws. No more ladders, nails or triple grips, the screws were installed from ground level in 3 seconds” Dan Evans, Evans Building

For us, it was a simple transition to SDWC screws that didn’t impact our production or costs, whereas the alternative screws would have meant that we had to change our entire production procedure, at large costs.”

Thanks to *Quik Stik*, SDWC can be installed from the safety of the floor, without the need for ladders.
