

Meyer **TIMBER**[®]

Changes to the National Construction Code (NCC 2022) mean that set down wet areas will become increasingly common. These include:

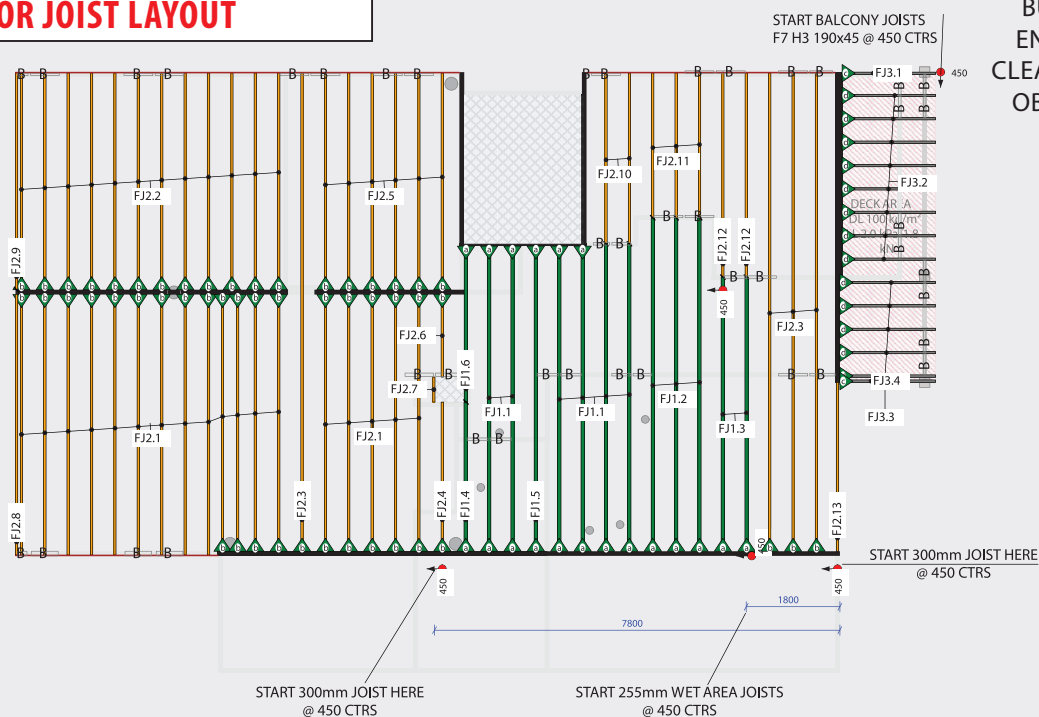

- A fall in the floor is now required to all floor wastes, including non-mandatory wastes.
- The fall in the floor has been increased to 1:80 minimum.
- Finally, at grade connections are no longer allowed to branch drains, with incline to be at least 15°.

Meyer Timber[®] has solutions to these changes with our complete range of flooring and joist products.
